
YOUR SAFETY DEPENDS ON YOU

- ☺ Maintain your vehicle in an acceptable safe condition.
- ☺ Reduce and adjust speed to weather, road, and traffic conditions.
- ☺ Allow more room for stopping and avoid the necessity of sudden stops by driving slow.
- ☺ Allow other motorists a wide margin of safety, remembering they may also be having difficulty with stopping.
- ☺ At night, the most important factors are full attention and control.
- ☺ Don't Drink and Drive.
- ☺ Wear Your Seatbelt at all times.

*The best way to survive an
accident is to avoid it*

*Driving is a fulltime
job*

TRAFFIC SAFETY

Don't take any risk

YOUR SAFETY DEPENDS ON YOU

The harvest of sugar beets has started on 3rd October 06 and will extend through Christmas. Many farm tractors with trailers will be on the roads, tracking mud and dropping beets, which create hazardous slippery conditions. They also move very slowly and are poorly lighted which adds to the hazards of driving. These dangerous elements combined with shorter daylight and inclement weather represent a greater risk and accident potential.

Assessing The Risks.

Defensive Driving.

Be alert to all potential hazards

Adjust Speed to weather, road & traffic conditions

👍 **Allow more
room**

Be Safe

Safe distance

=

No Less than 2 car lengths
